M.C.S. EXAMINATION

(Third Semester)

MS-14

MANAGEMENT INFORMATION SYSTEMS

Time : 3 Hours

Maximum Marks : 100

Note : Attempt any *Five* questions. All questions carry equal marks.

1. Critically examine the statement, "Managers need only information and not data". Describe the characteristics of MIS and state how MIS help in better decisions ? How does MIS help managers in discharging their basic function of planning, organizing, directing and controlling ?

2. Critically evaluate in technical and financial terms the strategies for acquiring hardware as well as software for a business organization during MIS development.
3. Describe various criterion based on which the effectiveness of MIS is determined ? How proper integration of operating information systems lead to increased efficiency of MIS ? Discuss the role of MIS as a technique for making programmed decisions.
4. How is the feasibility study carried out in a system analysis and design venture ? Highlight the main considerations involved in technical, human and economic feasibility.
5. Clarify the concept of Efficiency and Effectiveness. How will you determine efficiency and effectiveness of MIS ?
6. How will you evaluate MIS ? Why do MIS need modifications ? How is the documentation necessary for evaluation and modification ?

7. Differentiate MIS from the following :
 - (a) TPS (Transaction Processing System)
 - (b) DSS (Decision Support System)
 - (c) ES (Expert System)
 - (d) OAS (Office Automation System)
8. Write short notes on the following :
 - (a) Decision Trees and Decision tables
 - (b) Physical flow diagram and Logical flow diagram
 - (c) Information technology tools and MIS
 - (d) Control and Maintenance of MIS.
